

Garden Sheds and Lockers

Garden sheds and Lockers are strong and secure products that provide dry storage for multiple bikes and accessories. Unlike public lockers; they can contain 1-4 bicycles depending on their size. Installation: typically lockers and sheds come flat packed and require assembly in their location. Fixings, footings and maintenance all contribute to functionality and durability.

Typical Context of Use:

Secure, sheltered storage of bikes in outdoor domestic space such as a garden, drive or alleyway.

Number of Bikes per Unit:

From 1 to 4.

Approximate Cost per Bike:

Around £260 - £600 per unit = £65 - £150 per bike.

Locking Opportunities / Lock Compatibility:

Good – securely encloses all bikes that can enter through its doors though addition of a ground anchor to lock bikes to will add to security. All lock types can be used inside shed, though ground anchors may limit lock compatibility.

Ease of Use / Time to Lock:

More time consuming to use than uncovered options. Ease of use of garden sheds / lockers is dependent on access.

Strengths:

- Strong
- Secure

bikeoff 2

- Weatherproof
- Compatible with a wide range of bicycles
- Offers storage opportunities for accessories
- 5-25 years, depending of the material and the context of use

Weaknesses:

- Takes space
- Can be expensive
